

Wearable Sensor Motion Analysis Study

What is the study?

- The purpose of this study is to understand changes in patient movement patterns and how they relate to muscle health in patients diagnosed with chronic low back pain.

Do I qualify?

- Patients with chronic low back pain for at least 3 months.
- 18 years or older.
- Must be able to walk and get in and out of a chair without assistance.
- No prior spinal surgery

What would be required of me as a participant?

- 30 minute motion assessment using wearable sensors
- 30 minutes-1 hour long MRI of lumbar spine

Will there be compensation?

- We are offering a \$100 gift card
- Brief report of data collected (non-diagnostic) available if desired
